## **Chinese New Year**

I had a wonderful and enjoyable Chinese New Year Holiday! I like spending time with my family and friends.

On the first day of the New Year Holiday, my family and I went to visit my grandparents in the morning. We first greeted our grandparents and gave them a present. Then they gave us red packets. After that, we ate turnip cakes and New Year cakes together. They were so delicious! I ate a lot of candies with my sister too. Grandma suggested us to eat fewer candies because they are bad for our teeth. In the afternoon, we had dinner and returned home.

On the second day, my relatives came to my home. We had a busy afternoon. I played with my cousins. My mother had to prepare for the dinner. Although we were busy, we were happy!

Mother told me that Chinese New Year means the start of the new year, beginning on the second new moon after the winter solstice and ending on the full moon fifteen days later. People visit their family and friends, have special meals and watch fireworks to celebrate this special festival. Nowadays Hong Kong people spend most of the time at work, we seldom spend time with our family and friends. For me, Chinese New Year Holiday is absolutely a good period of time to create happy memories with my family and friends.
