An Invention that will transform the World

Humans are under Covid-19's attack, Scientists are figuring out the way to stop this madness as fast as possible. Here's my invention – the virus extinguisher!

This invention can extinguish any virus (including COVID-19) but not including probiotics, they are good for your intestines). It's a medicine, drink it and all the harmful viruses will be extinguished in no time. But this medicine will have a side-effect, it will cause forty-percent of bad luck to you. The bad luck could be anything, the light bulbs might turn off, suddenly you bump into a pole accidentally or get tripped by your pet in your own house.

Well, I don't think it's possible for such medicine to exist. We're now all depending on the scientists. I hope they can save us all.
